

To whom it may concern,

I am writing to ask that you help prevent the Klove radio from being displaced. Klove exists to serve the community and does an amazing job at community care and providing a positive influence into a very negative world.

The effect on the local community if K-LOVE were to be displaced by an LPFM broadcaster providing other programming would be bad, and should be prevented at all cost.

I believe that the positive music and Christian family values are promoted by K-love have changed my life over the years. As I travel around the country I am able to listen to the station in different places and be part of community even when away from home. Removing this from any location in the US would be harmful to any of those communities. Please do not allow the displacement of this FM signal

Thank you
